ered at postoffice at Ban Antenin, Texas, ond-class matter. SATURDAY, NOVEMBER 3, 1882.

ONE can now go to the City of Mexico, for San Antonio via El Paso, by the Mexic Central and stage, in about 10 days.

"It is the abuse and not the use of the credit system that causes so much trouble," the sage conclusion of the Brenham Hanner.

It come not make much difference how and an article is if the owner does not choose a advertise it; other people will not find it

Tits Texas Congressman who does not sait to be interviewed upon the great ques-ons of the day, will have to take to the

fr is asserted that there are 137 banks in case, with an aggregate capital of \$4,667,-45 in which the deposits amount to \$11,-

San Antonio hally needs a spiralid and first-class theatre, capable of sesting a 500 persons. The court house might be converted into such a building.

THE anti-Ireland boom is not a very great success up to date, and beyond a little str, will not effect that gentleman very much. He has the nomination by the polinaise.

THE LIGHT has received the first number of the Tilden Ledger, published by W. C. Blowen. It is a nest, fire column paper and fall of local nesses, and the LIGHT wishes for it unbounded success.

The City of Mexico is rapidly catching on to the spirit of the age. The city administration estimate that they can expend \$5,000,000 in jeropresencement. They will attempt to regulate a lean of \$5 000,000, and obtain as much more from subscriptions from the citients.

Then new Methodist church near Travis park will soon receive its roof and be pushed forward to completion. It is admirably incused as one corner of the park, way from the noise and city of the business thoroughfares, and title tair, when finished, to be an ornament to the city.

SAN ANYDERO will soon have a brewery in operation here and will keep at home \$250,000 entreally, which now goes to St. Louis. Let us have a cotton and a woolen factory, next, spon the San Antonio river. There is altendance of power in the river to run a couple of factories.

Text Fort Worth Democrat thinks that the Husaton Poet has "done up" Representative Catherson in the publication of its interview alongwide of the one in the Galveston News. It does look powerfully that way, and is a solemn warning to our leading men that they should not talk so much with their mouths.

Building still continues to be the order of the day. At least for large first-class houses, several of which are to be four stories in height and built of stone, are now under way. Dwelling houses are going up in all portions of the uity with automisting explicity. It is gratifying a see the sidewalks on several streets are using cultatorially improved. The only retain it is not general.

SECRETARY LINCOLN will, it is said, recom-mend to Congress in his annual report some legislation designed to prevent describe from the sarry, by smellorating the condition of the private soldier. He thinks one great cause of describe is the amployment of the soldier as a laborer at the amployment of the soldier as a laborer at the saray forth, and he will recom-mend that Congress will either create a grade of army laborers or give the soldiers extra duty pay when employed in such way.

Hunt and Dults counties, for the purpose of deviating means to suppress the fence cutters. An organization was effected and a resolution was passed giving fale warning to the fence cutters to the effect that all persons known to be engaged in such deprestations would be happenedly responsible for the act, and it is quite likely they will be able to put a stop to the business.

This improvement which has taken place on fast Hondron arrest within the past year seems to be the work of single. It is now decidedly one of the finest and handsoment streets in San Antonio, and is still being improved by the section of houses. When a few gaps shall have been built up with tasteful houses said the sidewalke pasted, it will be the "Broadway" of San Antonio. Ene long, the large wholesale business houses will be located upon Honston street on account of its breadth.

Ex-LIEUTEMANT PLITTER, according to the EI Pase Times, is in that city engaged in bunestly earning a living. The Times ways: "The fact that he is working in the office of a city hauntry shows that he has the proper courage, and is made of better stiff than some suppose him. Many man would have thrown themselves away completely after going through Pipper's experience, and it is a credit to him that he is striving to build himself up, with the hope, as he says, of one day seeing justice done him. His case will be put before Congress at the next session by his influential friends, and he is assured of a strong effort in his favor."

THE New York Times says of the political simulation in that State: "Democratic dianced is by no means confined to this city. The failure to agree here will give non-sion of great slaughter of the State ticket in New York City. The rank and file of the party care absolutely nothing for the Democratic State ticket. Some of them do not appear to know there is any State slection coming on. Shirewel Democratic managers aware of the intermedies warfare prevailing in several Sentantial districts outside of this city are ready to concede the State to the Republicans. The language and indifference with which Democratic in New York, Buffalo, Rochester and other cities regard their State nominues should impire Republicans to new efforts. Democratic discord as Republican opportunity, Tammany proposes to show the State how much power it possesses. This means that organization has burned its bridges and will rule or rain."

rule or rain."

Mr. C. G. Voorst, editor of the Boerne Land Register, in his report as a delegate to the meeting in the interest of the Guil, San Antonio, Colorado City and Kanasa City millroad, held at Colorado City, says: "I desire to say that the people of Colorado City are carnet in this undertaking, and fully appreciate the advantages that their section will describe the advantages that their section will derive to the building of this great stock route. They have the plock and perseverance as well as capital at their disposal to extry out this great peoplet. In addition to a great deal of home capital a syndicate of wealthy Northern capitalists bare expressed their intention to aid this enterprise. The President of the Colorado National bank will visit San Autonio and probably also Boerne President of the Colorado National Isash will visit San Autonio and probably also Boeme within a furtinght to receive subscriptions to stock, and it is to be hoped Sas Antenio will respond in proposition to her wealth and that Boerne will take stock sufficient to mittle us to at least one director in said company. It is the intention to begin as soon as predicable the construction of this read from Colorado City towards San Autonio and from Colorado City meands San Autonio and Roma Colorado city; and as soon as connections are made to extend the road to the heat port on the Guilf. A Kansas arilload will join the Guil, San Antonio, Colorado City and Kansas City railroad and make this a grand trank line."

rado Gity and Kanase City califord and make this a grand trank line."

In an article on the German immigration to Tesas, the Fort Worth Gasette says: "Whether as merchant or as farmer, the German is characteristically conservative and industrious in the pursoit of his vocation. He disclaims alike wild cat methods or sloggish ways. He accumulates carefully and plows deep. The German farms in Southen Tesas are notable instances of thrifty handling and intelligence. They have demonstrated to the American the value of careful cultivation and frugal mixtagement. We repeat, without any device of at all disparaging the native American element, that the German immigrant has leavened the body politic no less in political than in industrial matters in this State. He has thus been doubly valuable, and we are always gratified when we rend of an occasional ship head of Germans reaching Tesas to settle here. They never come as paupers or assisted immigrants, and they go out quietly and quickly through the State, to be in time absorbed in the vast area open to them, but surely dustined to place the impress of their characteristics, suprations and methods upon the section where they stop, doing their part, and a useful one, in shaping the social, meral, industrial and political progress and condition of the State. Texas can accommodate them as fast at they are coming now. Blended with the American and given another decade, and they will help to make this State what it is worthy of heing—as to wealth, development and general progress."

Salessee,

worthy of being—as to wealth, development and general progress."

Solutions.
Intermetion was received in the city yesterday that Joseph Glass, a farmer residing on the environs of the city, but committed suicide by blowing out his brains. It appears that an Thursday night the deceased louded a Kentzeky rife, and placed it against his brain. Then he managed to touch the trigger. The gam exploded, scattered his brains, and caused alimnit instantaneous death. An incased alimnit instantaneous death. An inquest was held on the remains of the federated, but no motive much be saigreed for the act, mare that of temporary muntal absertation. The deceased has many friends in this city and was highly sistemed.
